

# NAVILUTION

## DUO

## Welcome to the Next Generation of GPS Commentary.

Navilution Duo represents the only complete solution for Public Address System delivery of your audio tours. Increase ridership and passenger satisfaction by engaging your customers with five-star listening experiences.

## High-Quality, Consistent Audio Experiences.

Navilution Duo introduces an entirely new level of quality and reliability to GPS commentary systems. Not only does this mean less support and low maintenance, you'll also reap the benefits of happier passengers!

Experience the world's first complete solution for Public Address System delivery, giving you the confidence that your customers are getting premium sightseeing experiences every time your tours depart. Keep your passengers engaged and entertained, watch your business grow and gain a distinct edge in your market.

## Smartphone Integration.

Our hardwired Driver Control Panel is optional. Connect any smartphone or tablet with a browser to our Navilution solution for an instant wireless Driver Control Panel.

## Consistency is the Key.

If you're not providing engaging, entertaining tours consistently, you're missing out on your potential to grow. Worse, you're giving market share away to your competitors who are doing a better job of getting into the hearts – and wallets – of discerning tourists.

Navilution Duo is an affordable option for companies seeking to provide better tours. Built on the Navilution platform, Duo shares the Navilution line's class-dominating technology, quality and reliability and future-proofs your investment with upgradability all the way up to the industry-leading Navilution Next.

## GPS Receiver.

The latest in GPS receiver technology, this high-sensitivity, highly accurate, 12 parallel-channel, WAAS-enabled GPS receiver comes with an integrated magnetic base and optional window mount.

### Visual Time and Route Management.

Thanks to the Driver Control Panel's at-a-glance time indicator, drivers and captains can better manage route timing without having to slow down or speed up.

### Complete Control in the Drivers Hands.

Designed alongside driver and captain feedback, Navilution improves safety and reduces distraction through simple, two-finger touches for drivers to access Safety, Emergency and Filler commentary (off-route audio).

### Cloud Computing. Always up to Date Software.

Amazing business agility, more responsiveness and support and less risk because we host Cortex in the cloud. You'll never have to worry about an update again.

### Support for PA Systems.

Experience astonishing time savings when working with PA systems thanks to the simple, single-touch assignment of language channels.

### Up to 4 Languages At Once

Offer passengers a unique tour experience in multiple languages with the included 4 dedicated wireless channels. \*Wireless receivers required.

### Leading GPS Technology

Highly-accurate & super-reliable audio and video content delivery at the exact right moment and location.

### Future-Proof Update Capability.

Simple software and feature update capability keeps your business and tour solutions at the cutting edge for years to come.

### Unique Video Extensibility.

Enhanced attention and emotion grabbing video experiences with new opportunities for promotional and hearing-impaired communications.

### Duo & Cortex. A Match Made in Tour Heaven.

Navilution Cortex is the software solution that powers every Navilution system.

NAVILUTION
